Sahaj Bhadja

(213) 284-4651 sahajbhadja10@gmail.com sahaj-bhadja sahajbhadja sahaj-bhadja

Summary

Software Engineer with 2+ years building **TypeScript/React** products, **SQL-backed** APIs, workflow automation, and AI-enabled internal tools for fast-moving product teams.

Education

University of Southern California, Los Angeles, CA **August 2024 – May 2026**
Master of Science in Computer Science *GPA: 3.75/4*
Coursework: Database Systems, Web Technologies, Analysis of Algorithms, Advanced NLP

Pandit Deendayal Energy University, Gandhinagar, India **November 2020 – May 2024**
Bachelor of Technology in Computer Science and Engineering *GPA: 3.88/4*
Coursework: Object-Oriented Programming, Software Engineering, Operating Systems, Data Retrieval

Experience

USC Dornsife **September 2025 – Present**
Software Engineer *Los Angeles, CA*
- Built **SQL-backed** AI education platform with normalized schemas, row-level isolation, and indexed dashboards, reducing latency from 1.2 seconds to 350 milliseconds for 500+ campus users across releases.
- Reworked **workflow automation** using FastAPI background jobs, explicit states, failure isolation, and reusable status APIs, processing 1K+ AI tasks while tripling throughput for concurrent product workflows and dashboards.

Grad8 **June 2025 – August 2025**
Software Engineer Intern *Los Angeles, CA*
- Built **React** and Flask AI grading workflows for uploads, rubrics, history, and model selection, supporting 150+ instructors and 10K+ daily requests through product dashboards and APIs reliably.
- Designed **AI-powered** file-ingestion services with OCR, ThreadPoolExecutor, and secure uploads, reducing feedback turnaround 60% while keeping batch processing reliable, observable, and responsive for users during submission peaks.

Aasma Technology Solutions **August 2023 – July 2024**
Software Developer Engineer - (SecureSync) *India*
- Engineered **CI/CD** pipelines for cross-platform microservices with Jenkins, VM automation, and 20+ PyTest, Mockito, unit, and integration suites across Agile release cycles and QA reviews with teammates.
- Troubleshot **API integrations** using OOP patterns, SQL workflows, Amazon Web Services Glue, and S3, improving response times 30% while reducing technical debt 20% across production defects and releases.

Aasma Technology Solutions **May 2023 – August 2023**
Full Stack Developer Intern - (VibrantChem) *India*
- Developed **React** and Node resource-management workflows with REST APIs, WebSockets, and modular services, synchronizing 2M+ records across locations with 33% fewer conflicts during staged rollouts for teams.
- Implemented **automation** modules for authentication, resources, billing, leads, permissions, and notifications, using Jenkins CI/CD and Docker staging to cut deployment time 50% across product releases and fixes.

LST Capitals **November 2022 – January 2023**
Web Developer Intern *India*
- Built **TypeScript** booking flows for time-slot selection, reservation tracking, coupon pricing, and payment-status updates across 50K+ records with sub-200-millisecond APIs for cross-platform users during client demos and reviews.
- Designed **fintech-style** payment architecture for 12+ integration points, aligning Flask APIs, Firebase synchronization, payment webhooks, and client requirements to reduce design errors 25% before implementation handoff reviews.

Skills

Languages & Foundations: TypeScript, JavaScript, Python, Java, C++, SQL, HTML, CSS, OOP, Data Structures, Algorithms, System Design
Frontend & Product: React, Next.js, React Native, Responsive UI, Dashboards, User-Facing Workflows, Product Prototyping, Figma, End-to-End Ownership
Backend & Data: Node.js, Flask, FastAPI, REST APIs, WebSockets, Microservices, API Design, Authentication, Background Jobs, Payment Webhooks, PostgreSQL, SQL Server, MySQL, MongoDB, Firebase
AI, Cloud & Delivery: LLM Workflows, OCR, Prompt Workflows, Workflow Automation, Amazon Web Services, Azure, Docker, CI/CD, Jenkins, GitHub Actions, Git, Unit Testing, Integration Testing, PyTest, Mockito, Debugging, Agile

Projects

Advisor Workflow Automation Console | *TypeScript, React, SQL, FastAPI, LLM Workflows, Webhooks*
- Designed **advisor workflow automation** concept with React dashboards, SQL task queues, webhook triggers, and LLM-assisted summaries to reduce manual portfolio-review preparation and internal handoffs for operations teams.

FinNexus Live | *Next.js, TypeScript, MongoDB, Plaid, WebSockets*
- Built **fintech** platform with Next.js, TypeScript, Plaid, MongoDB, WebSockets, and CI/CD, supporting secure bank linking and real-time transaction filtering across 1M+ transactions online for users reliably at scale.

Chat2SQL Code | *Java, TypeScript, SQL, Docker, Maven, Node.js*
- Built **SQL** development workspace with Java, TypeScript, Docker, Maven, Node.js, and 10+ database integrations, accelerating query authoring, schema exploration, and cross-platform developer workflows from one interface efficiently.
