Sahaj Bhadja

(213) 284-4651 bhadja@usc.edu sahaj-bhadja sahajbhadja sahaj-bhadja

Summary

Software Engineer with 2+ years building full-stack business applications with **Java**, **React/Angular**, **SQL**, and **RESTful APIs**, backed by CI/CD, cloud deployments, and thorough testing.

Education

University of Southern California, Los Angeles, CA **August 2024 – May 2026**
Master of Science in Computer Science *GPA: 3.75/4*
Coursework: Database Systems, Web Technologies, Analysis of Algorithms, Advanced NLP

Pandit Deendayal Energy University, Gandhinagar, India **November 2020 – May 2024**
Bachelor of Technology in Computer Science and Engineering *GPA: 3.88/4*
Coursework: Software Engineering, Object-Oriented Programming, Operating Systems, Data Retrieval

Experience

USC Dornsife **September 2025 – Present**
Software Engineer *Los Angeles, CA*

- Designed normalized **SQL** schemas on Azure SQL with row-level security for a multi-tenant platform serving 500+ users, cutting dashboard latency from 1.2s to 350ms through query and indexing optimization.
- Built FastAPI **REST integrations** across PostgreSQL, SQL Server, and cloud storage, running 5K+ monthly data-exchange jobs with validation, reconciliation checks, error handling, and **CI/CD** releases at 99%+ production reliability.

Grad8 **June 2025 – August 2025**
Software Engineer Intern *Los Angeles, CA*

- Built a full-stack grading application with **React** interfaces and Flask **RESTful APIs** for uploads, grading history, and question management, serving 150+ instructors with 10K+ daily requests and 60% faster feedback.
- Deployed the platform with GitHub Actions **CI/CD** to Render and Vercel, adding concurrent PDF, DOCX, and ZIP ingestion over **MySQL** on AWS RDS that processes 1K+ files per batch.

Aasma Technology Solutions **August 2023 – July 2024**
Software Developer Engineer – SecureSync *India*

- Built 20+ **unit and integration test** suites with PyTest, Mockito, and nightly Jenkins pipelines across Windows, Linux, and macOS, collaborating with Microsoft and GitHub stakeholders through Agile Scrum delivery.
- Troubleshot and optimized large-scale **API integrations** with object-oriented Singleton and Factory patterns, pagination, and caching, improving response times 30% for low-bandwidth users while cutting technical debt 20%.

Aasma Technology Solutions **May 2023 – August 2023**
Full Stack Developer Intern – VibrantChem *India*

- Built eight **Java Spring Boot** microservices with an **Angular** front end for authentication, resources, billing, leads, and notifications, synchronizing 2M+ records through REST APIs and real-time WebSocket updates.
- Automated Jenkins **CI/CD** with Docker packaging, unit, integration, and end-to-end tests, and Azure SQL deployments, reaching 95%+ build validation while usage analytics insights cut resource wastage by 42%.

LST Capitals **November 2022 – January 2023**
Web Developer Intern *India*

- Developed Java **Spring Boot** REST APIs for bookings, pricing, coupons, and payments with Firebase **real-time** status sync, sustaining sub-200ms latency and 40% faster booking confirmations across 50K+ records.
- Translated **client requirements** into end-to-end architecture and **UI/UX** flows in Figma, mapping 12+ integration points and reducing design errors 25% before cross-platform React and React Native implementation.

Skills

Languages: Java, TypeScript, JavaScript, Python, SQL, HTML, CSS, Shell
Frontend & UX: Angular, React, Next.js, React Native, TailwindCSS, UI/UX Design, Figma
Backend & APIs: Spring Boot, RESTful APIs, Node.js, Flask, FastAPI, WebSockets, Microservices
Databases: SQL Server, Azure SQL, PostgreSQL, MySQL, MongoDB, Firebase
Cloud & DevOps: Microsoft Azure, AWS (S3, RDS), Docker, Git, GitHub Actions, Jenkins, CI/CD
Testing & Practices: Unit Testing, Integration Testing, End-to-End Testing, JUnit, PyTest, Mockito, Selenium, Agile/Scrum, Troubleshooting, Requirements Gathering

Projects

Shop-Floor Downtime Tracker | *Java, Spring Boot, Angular, SQL Server, WebSockets, JUnit, GitHub Actions*

- Designed a real-time production-line monitoring app with **Spring Boot** REST APIs, **Angular** dashboards, and SQL Server, streaming downtime events over WebSockets and exporting shift reports with JUnit-tested CI/CD.

Chat2SQL Code | *Java, TypeScript, SQL Server, PostgreSQL, Docker, Maven*

- Extended a **Java** and TypeScript database workspace supporting 10+ relational and NoSQL systems, accelerating SQL authoring, schema exploration, and data management through Docker-based, cross-platform Maven and Yarn builds.

HMIS – Hospital Management Information System Live | *TypeScript, MERN, ABDM APIs, Twilio, Sentry*

- Built a TypeScript operational workflow platform with consent-based ABDM API integration, appointment dashboards, Twilio alerts, and **Sentry monitoring**, managing 100+ daily appointments and cutting administrative workload 30%.
