Sahaj Bhadja

(213) 284-4651 bhadja@usc.edu sahaj-bhadja sahajbhadja sahaj-bhadja

Summary

Software Developer with 2+ years building full-stack enterprise applications with **C#/ASP.NET Core**, **React**/TypeScript, **SQL Server**, and REST APIs on **Azure**, backed by automated testing, CI/CD, and AI-assisted development.

Education

University of Southern California, Los Angeles, CA **August 2024 – May 2026**
Master of Science in Computer Science *GPA: 3.75/4*
Coursework: Web Technologies, Database Systems, Analysis of Algorithms, Advanced NLP

Pandit Deendayal Energy University, Gandhinagar, India **November 2020 – May 2024**
Bachelor of Technology in Computer Science and Engineering *GPA: 3.88/4*
Coursework: Object-Oriented Programming, Software Engineering, Operating Systems, Data Retrieval

Experience

USC Dornsife **September 2025 – Present**
Software Engineer *Los Angeles, CA*
- Designed normalized multi-tenant schemas on **Azure SQL** and **SQL Server** with row-level security for 500+ users, cutting dashboard latency from 1.2s to 350ms through query tuning and indexing.
- Built asynchronous **REST API** services and integrations across SQL Server, PostgreSQL, and Blob Storage, processing 5K+ monthly jobs with validation, error handling, and CI/CD releases at 99%+ production reliability.

Grad8 **June 2025 – August 2025**
Software Engineer Intern *Los Angeles, CA*
- Developed a full-stack platform with reusable **React** components and REST APIs for uploads, grading history, and question management, serving 150+ instructors and 10K+ daily requests with 60% faster feedback.
- Integrated **generative AI** models including GPT-4o and Claude behind a switchable provider layer, validating outputs and tracking per-call token cost while concurrent batches processed 1K+ files reliably.

Aasma Technology Solutions **August 2023 – July 2024**
Software Developer Engineer – SecureSync *India*
- Built object-oriented API integration modules with **Singleton and Factory patterns**, pagination, and caching, improving response times 30% and cutting technical debt 20% across a microservice-based data-sharing platform.
- Automated 20+ **unit and integration test** suites with mocking through PyTest, Mockito, and nightly Jenkins CI/CD across three operating systems, delivering in Scrum sprints with Microsoft and GitHub stakeholders.

Aasma Technology Solutions **May 2023 – August 2023**
Full Stack Developer Intern – VibrantChem *India*
- Built eight **ASP.NET Core** Web API microservices in C# with Entity Framework Core on Azure SQL and React/TypeScript front ends, synchronizing 2M+ records across locations via REST and WebSockets.
- Deployed Docker builds to **Azure App Service** through Jenkins CI/CD with unit, integration, and end-to-end tests and Snyk scanning, reaching 95%+ build validation and monitoring production via Azure Monitor.

LST Capitals **November 2022 – January 2023**
Web Developer Intern *India*
- Developed C# **.NET** Web APIs for bookings, pricing, coupons, and payments with idempotent webhook handling, sustaining sub-200ms latency and cutting manual refund processing 70% across 50K+ booking records.
- Translated **client requirements** into an end-to-end architecture with 12+ integration points, then implemented Firebase real-time booking-status sync that sped confirmations 40% across React and React Native clients.

Skills

Languages: C#, TypeScript, JavaScript, SQL, T-SQL, Python, Java, HTML5, CSS, Design Patterns
.NET & Backend: .NET 8, ASP.NET Core, Web API, Entity Framework Core, LINQ, Dependency Injection, Async/Await
Frontend & Architecture: React, Component-Based Development, Micro Frontends, Next.js, REST APIs, Microservices
Databases: SQL Server, Azure SQL, Stored Procedures, PostgreSQL, Oracle, MySQL
Cloud & DevOps: Microsoft Azure, Azure App Service, Azure Monitor, Docker, Git, GitHub Actions, Jenkins, CI/CD
Quality & Practices: Unit Testing, Integration Testing, API Testing, Mocking, Code Reviews, SOLID, Agile/Scrum, AI-Assisted Development

Projects

Transaction Reconciliation Platform | *C#, .NET 8, ASP.NET Core, EF Core, SQL Server, React, TypeScript, Azure*
- Designed event-driven **.NET 8** microservices matching vehicle transactions against authority records via Azure Service Bus, with EF Core and SQL Server stored procedures, xUnit and Moq tests, and a React micro frontend.

Chat2SQL Code | *Java, TypeScript, SQL Server, Oracle, PostgreSQL, Docker*
- Extended a Java and TypeScript database workspace supporting 10+ systems, including **SQL Server** and Oracle, generating schema-aware queries with 82% accuracy and validated execution against relational databases.

FinNexus Live | *Next.js, TypeScript, MongoDB, WebSockets, Kubernetes, TailwindCSS*
- Built a **TypeScript** and Next.js platform with component-based UI, Plaid bank linking, a token-based firewall, and real-time updates across 1M+ transactions, deployed through Kubernetes and CI/CD pipelines.
